

CSA Global
Mining Industry Consultants

Delivering Mine Water Management Globally

Delivering mine water management solutions to open cut and underground mines all over the world.

ABOUT CSA GLOBAL

CSA Global is a mining, geological, technology and management consulting company providing strategic mining services and advice to companies in the international mining industry. We have more than 30 years international experience across all mineral commodities and offer a uniquely integrated and comprehensive set of services in the areas of corporate, mining, resources, exploration, technology and water.

OVERCOMING CHALLENGES

We collaborate with companies small and large and utilise the expertise of our hydrologists, hydrogeologists, engineers and geologists who possess knowledge in mine water management services globally. We tailor solutions based on the key issues facing your mine site. No project, region or environment is too complex for us. We have overcome challenges for finance companies seeking to review or report to meet due diligence requirements, new mines who require consultants capable of assisting with water supply, dewatering and surface water management or operational mines seeking to save money, improve efficiencies and become more sustainable.

SERVICES WE OFFER

- Water Management
- Water Supply
- Project Approvals
- Dewatering & Depressuration
- Ground & Surface Water Modelling
- Surface Water
- Mine closure
- Water system design
